Laundry Care Program

Spartan's Clothesline Fresh Laundry line is the newest technology in professional laundry care from a trusted name in the Jan/San Industry. Clothesline Fresh Laundry specifically targets soils and stains to get fabrics clean and bright, while leaving them with a fresh fragrance.

Contemporary Cleaning Technology:

Spartan's Clothesline Fresh Laundry Line contains the latest in laundry technology, which allows for superior cleaning performance at a lower cost! This technology is also more environmentally preferable than most traditional products.

Convenient Packaging:

Never run out of product unexpectedly again! With Spartan's translucent gallons, 5-gallon pails, 15 and 55-gallon drums, the amount of product remaining is easy to see. This will allow you to reorder with ease and always have the right amount of product on hand. Some products are also available in standard gallons for convenience.

All of Spartan's Clothesline Fresh Laundry Care products are packaged in 5-gallon pails with an innovative closure that allows for the insertion of dispenser tubing right into the pail. This is safer, less time consuming and reduces the chance of product contamination. Spartan also offers identification tags to place on dispenser lines for each Clothesline Fresh product for easy identification.

Spartan offers many dispensing options to keep the laundry area clean and safe for employees. This includes tubing that goes from the product to the dispenser or machine so product is never exposed.

Color and Number System:

Each Clothesline Fresh Laundry product has a color and number assigned to it. All product information and literature, plus each product label, carton and secondary label reflects this color and number, making training easier and faster!
